A RADIO PROGRAMME

of interest to paint users. Listen to Lowe Brothers famous composers program over station CKLC, Red Deer, Thursday, February 27th at 9:00 p.m. Also over CKY, Winnipeg on Monday at 8:00 p.m. CJRM, Moose Jaw on Wednesday at 8:00 p.m. Lowe Brothers will broadcast a program each week on the above days throughout the summer.

Homes with charming exteriors and lovely interiors. How to achieve them—To those sincerely interested in beautifying their homes, who would paint their houses and decorate their rooms with appropriate colors, Lowe Brothers department of home decoration will mail you direct their house book illustrating the color scheme and proper color combination for your house, office, store or any building where proper color combinations are requested. Send me your name and address and I will have those books mailed to you direct from Lowe Brothers nearest distributing point, together with color cards and any other paint information that may be of interest to you. In buying Lowe Brothers paint and paint products you may apply them with the utmost confidence and with the assurance that you will thereby derive the enduring satisfaction that thousands of other house owners enjoy.

C. W. GRAY, AGENT, Carbon

Lowe Brothers high standard liquid house paint; Quick drying enamel (dries in 4 hours); Mellow gloss for walls, all colors; Truck and tractor paint; Floor enamels, Neptunite varnish and varnish stains; Red barn paint made from C.P.R. specification and similar to that used on stations, box cars, etc.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

S. J. GARRETT WILL BE MAYOR

At the first meeting of the new Village Council, held in the office of the secretary on Monday night, S. J. Garrett was elected as Mayor of the Village of Carbon for the year 1930.

A motion was carried authorizing the previous assessment of Village property.

It was decided at this meeting of the Council to cancel all well drilling near the Fire Hall and the well will be covered over for safety.

W. Leitch was appointed pound keeper for the Village.

CARBON SCHOOL FAIR ASSO- CIATION ELECTS OFFICERS

At the School Fair meeting held in the Farmers Exchange hall on Saturday, March 1st, the following officers were elected:

President, D. G. Code. Vice-President, J. Atkinson. Secretary-Treasurer, Miss K. Ramsay.

It was decided to interest as many schools as possible in school fair work and in order that interest might be aroused a number of directors were appointed. The following nominations were made:

For Carbon—Mr. Connolly, Mr. J. Ramsay, Mr. Jealous and Mrs. Peters. Avondale, Jas. Gordon. Roseview, Ray Bell. Berkley, Mr. Cardwell. Beveridge Lake, J. McEwan. Lenox, Geo. Appleyard. Gamble, Mrs. S. N. Wright. Webb, G. Hempseed. Kern, G. Ohlhauser. Hesketh, Mr. Sember. Garrett, G. Cadman. Mosher, J. J. Ohlhauser. Hubboldt, Mrs. Reid. Simcoe, Mr. Van Wart.

PRIMARY SCHOOL REPORT FOR MONTH OF FEBRUARY

GRADE IIA—Isabelle Gouldie, Bill Code, Elaine Torrance, Margaret Wheat, Jimmy Gouldie, Milly Hunt, Mae Moore, Elwood Kaehn, Harvey Barker, Mary Mayers, Billy Rogers, Bernard Moore, Annie Lemay, Gordon McGregor. Absent for tests, Doris Gauletz.

GRADE IIB—Annie Shyika, Albert Bramley, Irene Grenier, George Moore, Robert Ramsey, Betty Heath, Lucille Lemay, Victor Kaehn.

GRADE IIA—Marjorie Shale, Betty Willson, Pauline Schoeppe, Ellen Hedburg, Ralph Atkinson, June Collins, Lillian Dixon, Margaret Csepe.

GRADE IIB—Mary Mayers, Zena Trumbley, Arber Collins, Boleck Sobyski, Lawrence Trepanier, Helen Csepe. Absent for tests, Duncan Code.

REX, KING OF WILD HORSES, TO SHOW AT CARBON THEATRE

One of the finest type of Westerns, "Guardians of the Wild," a Universal picture, starring Rex, the King of the Wild Horses, comes to the Carbon Theatre on Friday and Saturday of this week.

The picture should have a wide appeal not only for the youngsters, but for grownups as well who crave thrill and action with their movie fare.

The theme of the story is a combination of drama and subtle touches of humour, in which Rex, the star, plays the part of the rescuing hero to the girl who is trapped in a cabin in the midst of a raging forest fire. Rex does not rely on his beauty alone to assure his success in pictures, but is the most finished animal actor in pictures today.

"Guardians of the Wild," is exceptionally well directed by the ace of western directors, Henry McRae, who has easily outdone himself in this greatest of Wild Horse pictures.

The supporting cast is excellent. Jack Perrin and his beautiful white horse, Starlight, are principals along with Ethylene Clair, Southern beauty, who has the heroine role.

WILL HE APPEAL?

HON. W. L. MACKENZIE KING

A new picture of Canada's Prime Minister, who, in his speech on the debate on the speech from the throne in Parliament last week, hinted that an appeal to the people this year in the way of a general election was not impossible.

CARBON OIL SYNDICATE TO HAVE INCORPORATE NAME

It has been announced that instead of the Kew Oil Company, the name for the new company for the Carbon Oil Syndicate will be The Carbon Exploration Co., Ltd. and the solicitor is now taking steps to have this company incorporated. This company, when incorporated, will take over all leases, etc. of the holding company and after the shares have been issued to the shareholders, it is anticipated that actual operations will be commenced.

WOULD PREMIER ANDERSON WELCOME DEFEAT?

It is not often that a Government faces a Legislation in the hope that it will be promptly defeated. It is not even the case in Saskatchewan today. But if the Saskatchewan House were to throw Premier Anderson out of office it is probable that he would shed no tears. He would be glad enough to appeal immediately to the electorate on the plea that he had not been given a fair chance to show what he could do.

At present Saskatchewan's "Co-operative Government," composed of eight Conservatives, one Independent and one Progressive exists on sufferance. It can command 35 votes in the house of 65 members, out of his supporters five are Independents and five are Progressives. If four of these ten men decide to co-operate no longer, the Government would go under. Dr. Anderson has done his best to make his position secure. Two of the ten "co-operators" hold cabinet position, another is likely to be made speaker, while a fourth has been made a government whip. The president of the Progressive association has got a government job buying grain and fodder for distressed areas, while another prominent Progressive has been appointed to the civil service commission which has been investigating conditions throughout the province. The president of the United Farmers of Canada has been working closely with the premier, who has done many of the things which the U.F.C. has wanted.

Nevertheless the Government has all the uneasiness of a coalition. Admitting that the five Independent members are really good Conservatives (a thing by no means certain) even ad-

LITTLE ITEMS OF LOCAL INTEREST

Miss K. Watkins, W. Edwards and R. Lynn were Calgary visitors over the week end.

The roads in the district are drying up fast although they are still very rough.

I. Guttman was a Calgary visitor this week and returned on Tuesday.

Don't forget the old time dance in the Elks hall tomorrow night.

Jack Shale is holding an auction of his household furniture next Saturday afternoon at 2 p.m.

Mr. and Mrs. J. J. Greenan returned last Friday from a visit to Calgary.

John Leiske of Belsaker was a business visitor in town on Wednesday.

There was a large crowd in attendance at the band concert at the First German Baptist Church on Sunday night last, over 240 people being present. The entertainment was very successful and the collection of \$32 was taken for the piano fund of the church.

Lammie's Beauty Shoppe will be open on Wednesdays, Saturdays and on days when a dance is to be held. Phone 36, Carbon. 11p

There are four Carbon rinks entered in the Acme bonspiel this week. The personnel of the rinks is as follows: A.F. McKibbin skip, H. Jealous, R. Wacker and J. Atkinson.

R. J. Fairbairn skip, L. Poxon, S.F. Torrance, and P. Edwards.

G. F. McGregor skip, R. Barr, Harry Evans and C. Moorhouse.

M. Skerry skip, A. Poxon, W. Poxon, C. Poxon.

IN MEMORIAM

DIXON—In ever loving memory of my dear husband, William Dixon, who passed from this life on the 4th day of March, 1929.

"One of the best that God could lend. A loving husband and a faithful friend. We mourn for him in silence unseen. And dwell in the memory of days that have been.

Inserted by his wife and children.

mitting that the Progressive members are prepared to support the cabinet and that all of them are not Progressives, there is an element of uncertainty in the situation which makes for danger.

The ten members who will be most closely watched during the session may all be supporters of Dr. Anderson, but few of them would be ready to fling their hats in the situation, which makes for Mr. Bennett and the Dominion Conservative party. Dr. Anderson is an honest Tory, through and through. He would, of course, prefer to have all his supporters lined up solidly behind him. Hence he might not object to being thrown out if the moment was ripe for an appeal to the people.

The Liberals, however, 28 in number and led by that seasoned campaigner, Mr. Gardiner, fully realize the situation. They are busy re-organizing their party. Mr. George Spence and Mr. Gardiner are all through the constituencies of the province, building up the nucleus of an attacking force. But it seems unlikely that they will attack directly in the House. They would rather manoeuvre things so that the onus of attack and defeat would rest upon the Progressive members. They will probably spend much time in the Legislation pointing out that no honest-to-goodness Progressive can support Dr. Anderson, but they will try and leave the actual attack to the Progressives themselves.

As for the Progressives, their quandary is great. The main object they had in mind last June was the defeat of "the Gardiner Machine." No one was more astonished than themselves when they succeeded. No one was more disgusted than they were to find

Production and Marketing Problems

The question of disposing of surplus farm products in an orderly manner, and thus prevent disastrous breaks in prices by reason of the throwing of a large portion of the surplus on the world's market at one time, all with a view to securing to the producer a fair margin of profit over and above costs of production, is not peculiar to the wheat growers of Western Canada. It is a problem which confronts agricultural producers in many countries, and applies to other products than wheat.

Governments and producers are grappling with the problem. In Canada it is wheat; in the United States it is wheat, cotton, and, as affecting its overseas possessions and Cuba, in which the U.S. takes a friendly interest, it is sugar; in Brazil and other South American countries it is coffee; in certain British colonies it is rubber.

In each case the problem is a most complicated one. Such factors as world consumption; world production, fluctuating with variable seasons from under-production to over-production; the ability of importing countries to pay the price demanded as fair by the producing and exporting countries; different seasons and methods of marketing; costs of labor and marketing in one country as contrasted with those prevailing in other competing countries, all enter the picture and call for consideration.

In the Argentine, for example, orderly marketing as we would develop it in Canada is impossible. In that great wheat growing and exporting country there is no elevator storage system. When the crop is harvested it must be rushed on to the market at once, and the growers are obliged to accept the price they can get for it at that time. If the crop is large, or if there happens to be a substantial world's surplus at the time, the effect is to force down world prices, with resultant loss, not only to the Argentine grower, but to wheat growers everywhere. The Canadian Wheat Pool had to face just such a situation in 1929-30.

In the United States a Federal Farm Board has been created and given a huge sum of money to use in an effort to stabilize prices of agricultural products in that country. That Board is now facing its first test. It has called upon the farmers to reduce production of cotton and wheat in 1930, by planting smaller crops. Will the farmers as a whole, or even a majority of them, respond? Or will the individual farmer act on the belief that, inasmuch as other farmers will follow this advice and prices thereby be raised, it is a good opportunity for him to increase his own production and secure the benefits provided as a result of the proposed general reduction? If so, then there is grave danger that a greater surplus than ever will be produced.

Or, if the United States farmers do follow such advice and reduce production, will advantage not be taken of it by wheat growers in competing countries to increase production, thereby defeating the object aimed at in world markets, and reap any benefits resulting from the sacrifice made by the United States farmers?

In a word, can the volume of production of such a world commodity as wheat be controlled? It is possible to control the output of manufactured articles, say, automobiles, boots, furniture, clothing, but can the production of nature's own goods from the soil be controlled in like manner by any artificial means, or must that be left to nature itself through the vicissitudes of the weather,—drought, hail, too much rain, plant disease and insect pests?

Great Britain tried the experiment of controlling the rubber markets of the world. For a time it succeeded; but just as soon as the world consumers of rubber felt the pinch of too high prices, steps to increase production in various ways were taken.

Or take the case of coffee. Brazil produces two-thirds of the world's supply of coffee. The Brazilian Government, to protect growers against price depression, in 1924 organized the Coffee Defense Institute. The Institute was not empowered to buy, but merely to see to it that coffee was kept in the interior, and released to exterior markets only when and as the demand and price-level were favorable. In the first few years of operation the Institute's aim was realized. The 1924-25 crop prices were almost exactly double the prices for which the 1922-23 crop had been sold. But there was one inevitable outcome. Higher prices for coffee and the restriction of Brazilian exports stimulated the output of other producing countries, with the result that Brazil no longer influenced the world market as much as previously. Whereas coffee production of all other countries before the war was only 6,000,000 bags a year, today it averages around 9,000,000 bags. Furthermore, Brazil went in more extensively for coffee growing. Following an average output of 14,000,000 bags annually during the decade beginning 1917, the crop production of 1927-28 reached the unprecedented total of 28,000,000 bags, or well above the estimated world consumption of 22,000,000 bags a year.

Then came the inevitable result. In October last, prices broke, and in January of this year prices for coffee were just one-half what they had been at the same period a year before. As a result there is in Brazil today a curtailment of credit, much unemployment, a cutting down of highway and municipal undertakings, a loss in foreign contracts, and a lessening of buying power in the other coffee countries of Colombia, Venezuela, Costa Rica, Guatemala, Salvador, Nicaragua, and Ecuador. The estimated world's supply of coffee for 1929-30 is 45,256,000 bags, while the world's requirements are placed at 23,000,000 bags, leaving an unsold surplus on July 1st next, to carry over of 22,256,000 bags, or nearly one-half of the total.

One of the leading United States agricultural weeklies, "Wallaces' Farmer," published at Des Moines, draws a lesson from "the sad state of Brazilian coffee and British rubber," saying: "Whenever an industry gets into position to control price, it is important to forget about cost-of-production theories. In a case of this sort, the only excuse for studying cost of production is to get an idea as to the point at which prices must be held in order to discourage other people from coming into the business and killing the goose that lays the golden egg, by stuffing her to death. The important thing is to hold the price a little too low, and apparently this is the one thing which organized farmers find it very difficult to learn."

Direct attacks are also made on the U.S. Federal Farm Board's plan to curtail production. One leading paper declares: "It is a distinct disservice to agriculture and to our economic structure in general to preach the doctrine of a sharply curtailed agricultural production. For with such curtailment must go migration of population from the farms to the cities, and with that either increased factory production creating the same problem of oversupply that now exists in agriculture, or an aggravated unemployment problem."

The magnitude of the problem confronting our farmers, our Wheat Pools, our financial and business men, our Governments, can hardly be overestimated. Because of the very magnitude of the problem, and the results which will flow from success or failure in finding a solution, it is the duty of all our people, in city and country alike, to stand unitedly behind those who are earnestly seeking a solution, and who are carrying an extremely heavy burden of responsibility at this time. It is a case where all must pull together, where carping criticism should be silenced, and the professional pessimist and preacher of blue ruin squelched.

PUTNAM'S

Soviets Seize Jewelry

Diamonds, precious metals, jewelry, foreign currency, antiquarian articles and other private property amounting to 100,000,000 rubles (about \$50,000,000), have been seized from private traders and other classes in Moscow, described as "parasitical" for payment of taxes owed to the government.

Made Wonderful Flight

Albatross Kept Up With Ship For 3,000 Miles

The flying powers of the albatross are well known, but news of an almost incredible feat of endurance has just been reported by officers of a Pacific liner from the Far East. For six days and nights an albatross followed the vessel, which averaged seventeen knots, and it was only when a school of fish was sighted that the bird abandoned the chase in order to feast. It was estimated that the bird had flown 3,000 miles, and what is more remarkable had apparently gone without food all the time.

SUFFERED FOR YEARS FROM NEURITIS

Electric Treatment and Osteopathy Proved Of No Avail

To suffer for four years from neuritis. To try electric treatments, osteopathy, have teeth and tonsils removed without receiving the least benefit was the experience of Mrs. Simon Rae, of St. Mary's Ont. Today, however, Mrs. Rae is a well woman—thanks to Dr. Williams' Pink Pills. These Pills did for her what all other treatment had failed to do. They built up her blood and banished all the aches and pains.

Concerning her suffering and relief Mrs. Rae says:—"I was a sufferer from neuritis and rheumatism for four years. I was almost a cripple and the pain I endured was terrible. I took sixty electric treatments without the least benefit. On advice I had all my teeth out. Then my tonsils but still no benefit. I then tried osteopathy and though I persisted in this treatment for six months I was no better at the end than at the beginning. I was a young woman living on a farm and found the greatest difficulty in doing the least work. My mother finally advised me to try Dr. Williams' Pink Pills, and more to please her than anything else I did so. Imagine my joy on noticing an improvement in my condition after having taken only a few boxes. I continued their use and now the pains and aches have left me and I am once more able to do my work about the house."

Neuritis and rheumatism comes with thin impure blood and can be driven out by enriching and purifying the blood. Dr. Williams' Pink Pills have been recognized for years—the world over—as a wonderful blood builder and nerve restorer. They are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Need Of the Hour

The gentleman, who asked over the radio what is the most important thing in the world is hereby informed that the most important need in the world is for men who will stand before the microphone and say less and entertain more.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Sugar Beet Acreage

Sugar beet acreage was increased to 3,470 in the Lethbridge region during 1929, or an increase of 1,188 over 1928, and comparing with 752 acres in 1925.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Foretold Use Of Steam

While the date of the invention of the locomotive is usually placed at 1829, Solomon de Cause, a Frenchman, published a book early in the 17th century concerning the "pushing of carriages and ships by boiling water and making steam." He was put in an asylum in 1630.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Regina Building Permits

Final figures of building permits for Regina show contracts just exceeding ten million dollars, or \$10,022,531 as compared with \$6,619,206 in 1928.

Use Minard's in the Stable.

Reticent Regarding Age

Men In British House Of Parliament Hold Back Information

Reticence regarding age is a characteristic and privilege usually attributed to women, but not so in the British House of Parliament. There are 102 male members of the new House of Commons who have not, so far, confided their ages to Dod's Parliamentary Companion, an official handbook.

Seventy-nine of them are Labor members, 16 are Conservatives, six are Liberals, and one is an independent. Of the 14 women members, nine claim the privilege and do not state their ages.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

A young Mississippi farmer who is only twenty years old has discovered how to make farming pay. His successful method was to elope with an heiress.

Saskatchewan Butter Production

An increase of 30 per cent. in the output of creamery butter over that of 1928 is seen in a report of the dairy branch of the Saskatchewan Department of Agriculture. The production during 1929 was 14,786,205 pounds of butter, as compared with 11,310,490 pounds in 1928.

Don't Get Bald!

Use Minard's. A recognized hair grower for fifty years. Apply to scalp steadily four times a week.

C.P.R. Farm Land Sales

Canadian Pacific farm land sales, made through the Department of Natural Resources, covered more than 400,000 acres in 1929, according to S. G. Porter, manager of the department. More than 200 sales were made in the company's irrigation block, eastern section, near Calgary.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

So Many Home Uses!

Keep foods fresh longer by covering them with Para-Sani

Use Para-Sani to keep Dad's lunch tastily fresh

Keep the freshness in sandwiches prepared for the party with a covering of Para-Sani.

YOU'LL FIND A hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged package. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

EDOUARD J. ROULEAU,
Editor and Publisher

THE DOLLAR THAT STAYS AT HOME

Once again the Alberta Develop-
ment Board appeals to citizens to sup-
port by their patronage and custom
the goods made and grown in Alberta.
It is thoroughly recognized, of course,
that no organization has any right to
appeal to anyone to buy its goods
merely on patriotic grounds. Economic
considerations are, to come to earth,
the only selling argument that is
worth while.

Nevertheless these considerations
are not the only ones which affect the
welfare or otherwise of the buying-at-
home problem. Every one of us, men
and women, consciously or uncon-
sciously, get into certain habits in the
shopping matter. It is a fact well
known to economists that we do ac-
tually buy the goods we see most per-
sistently advertised—one of the facts
which has been used as an argument
in favor of a tariff or other barrier
against foreign publications. A man
goes into a store to buy a cigar of a
brand he has been smoking for the
past ten years. He finds it is not
stocked and, rather than buy a pig
in a poke, he chooses as an alterna-

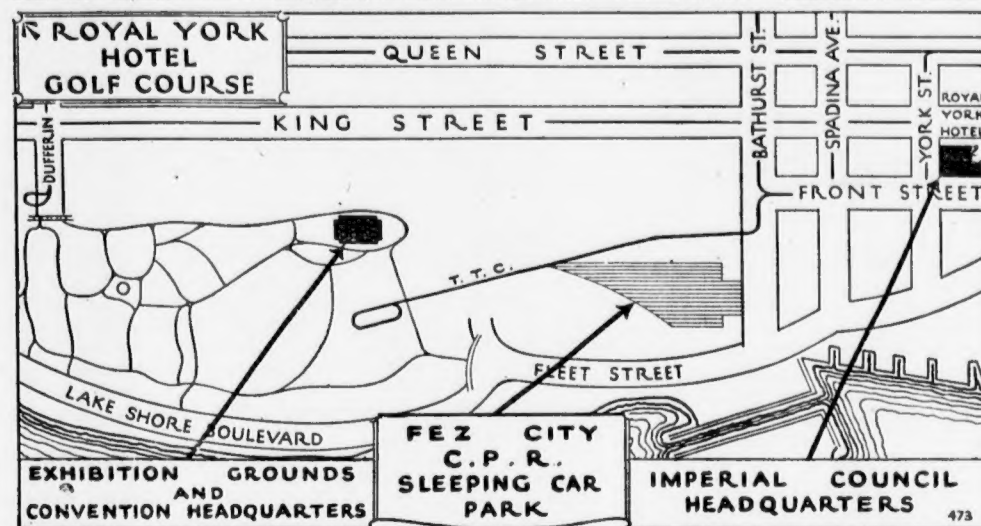

tive something he already knows by
name. As likely as not he is hence-
forth a convert to that brand.

Buying foreign-made goods, there-
fore, may be the result of habit, but
like most habits it can be cured by a
conscious effort. First find out what
goods are made in Alberta and then
if they are not inferior to the foreign-
made article—and neither the Alberta
Development Board nor anyone else
asks to be exempted from that con-
dition—get into the habit. By so doing,
the purchaser not only keeps the
wheels of industry turning and the men
and women at home employed, but he
creates a demand which compels exist-
ing industries to extend their plants
and create more employment; and he
helps to open up a field for still more
industries with still more employment.
He creates a need for more power and
it needs lots of workers to run a power
plant and still more to build it. Con-
ceding the economist's point that it
is not necessarily desirable that the
dollar should be kept at home if by
going abroad it can bring two dollars
back—treating the phrase about the
dollar that stays at home merely as
a convenient figure of speech, it ought
to be fairly obvious that the dollar
that finds its way into the local gro-
cer's till and thence to the local manu-
facturer's cash box and on to the lo-
cal bank is a more useful dollar than
the one that goes to pay the wages to
some worker in a foreign land or even,
to be positively parochial, in some
other province.—Calgary Albertan.

"The real engagement stone is a
diamond," says a writer. The marriage
stone, of course, is a grindstone.

A reunion feast was to be given at
a place in Scotland. It was thought
to be a good idea for each man to
bring something with him from his
native town. So, on the night, the
man from Edinburgh brought short-
bread and cookies; the man from
Dundee brought marmalade; the man
from Glasgow a case of whiskey; and
the man from Aberdeen brought his
brother.

Walter: "Are you Hungary?"

Walter: "Then Russia to the table
and I'll Fiji."
Broker: "All right, Sweden my cof-
fee and Denmark my bill."

Ready and fully equipped to house a population of
8,000, "Fez City" is now being built by the
Canadian Pacific Railway for the accommodation of
the army of Shriners who will make Toronto their
Mecca next June. Mainly, the city will be composed
of sleeping cars, three hundred of which will be im-
pressed into service while marquees will take the
place of administration and service buildings. It
will closely adjoin the exhibition grounds where
the Shriners will hold their convention. Fez City

will be fully equipped with a miniature hospital,
restaurant, barber shop, shoe shine and even beauty
parlors, news stands, cigar stands and candy coun-
ters. It will be cut in half by "The Midway" from
which 1st, 2nd, 3rd, etc., streets will radiate, and
"Rameses Drive" will handle all the motor traffic.
Canadian Pacific and City police will co-operate in
the protection of this new city. The cars will be
arranged in the order that they will pull out for home
at the end of the convention. The city will be
brilliantly illuminated by electric light.

Third Great West Canadian FOLK DANCE FOLK SONG AND HANDICRAFTS Festival at CALGARY MARCH 19 TO 22

Four days of lovely music and color,
illustrating the Arts, Crafts and Song of
the peoples of the prairie provinces—
British, French-Canadian and European,
with an American flavor of Cowboy
songs.

Singers, Instrumentalists, Folkdancers
from racial groups in the picturesque
costumes of their country of origin.

Visiting Artists, including Isabelle
Burnada, Selma Johansen de Coster
(The Swedish Nightingale) and Charles
Marchand, French-Canadian Folksinger.
Handicrafts organized by the Canadian
Handicrafts Guild (Alberta Branch),
Music and Folkdancing organized by the
Canadian Pacific Railway.

N.B.—Those wishing to exhibit handi-
crafts should communicate with Mrs. J.
J. Anderson, Secretary Alberta Branch,
Canadian Handicrafts Guild, 14 March-
and Apts., Edmonton, or Palliser Hotel,
Calgary, Alta.

Making Long Journey

Turkey From Alberta On Way To West Indies

A turkey from the farm flock of Mrs. R. Lockhart, Bowden, Alberta, is on his way to his new home in the West Indies, having been shipped to the Misses Boyd Stimpson, of Porus, Jamaica, reports G. M. Cormie, Alberta poultry commissioner.

This bird was selected by R. S. Johnson, president of the Alberta Bronze Turkey Breeders' Association, and shipped to Halifax, where he was loaded on shipboard for his destination. A special crate was constructed to carry the feed and water required by the turkey during his five-thousand-mile trip.

(By Annebelle Worthington)

A navy blue wool crepe that employs a scalloped border in vivid red shade is strikingly smart for that important age of 8, 10, 12 and 14 years. The red crepe appears again in belt that marks the normal waistline and in piping of collar, flared cuffs and bow tie.

The straight bodice suggests a basque. The skirt is circular, shaped with fluttering fullness at hem. Style No. 3315 is just as smart as can be. It is practical too. It is just the thing for classroom and will make an attractive outfit for Spring without a topcoat.

It is very fashionable in wool jersey in hunter's green with white pique collar and cuffs. Tweed in beige and brown check in lightweight with collar, cuffs and border cut on the bias is fetching, worn with a brown suede belt. Pipe the border at upper edge, and collar and cuffs around the outer edge with brown bias binding that comes already folded for this purpose.

Sportswear linen in tan with brown trim is very effective.

Wool challis print with plain challis, printed and plain rayon crepe, checked and plain gingham, flat silk crepe and shantung also suitable.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Stronger Than the Empire

Commonwealth Of Nations Has Been Wonderful Step Forward

Probably few British statesmen fifty years ago believed that the decentralizing of the Empire could go as far as it already has gone without disaster. Certainly, most statesmen of other countries agreed with Bismarck, who thought that the yielding of power by the central authority was a sure sign of weakness and decay. If he could have seen the Canadians holding out under the mysterious horrors of the first gas attack, or the Australians helping to smash the Hindenburg line, he might have changed his mind. To date, the ties created by sentiment and enlightened self-interest have more than replaced the bands of compulsion laid aside as outworn. The Commonwealth of Nations is stronger than the Empire.

Heart and Nerves Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

SUNDAY SCHOOL LESSON MARCH 9

THE PARABLE OF THE SOWER

Golden Text: "He that hath ears to hear, let him hear."—Matthew 13.9.

Lesson: Matthew 13.1-23.

Devotional Reading: Proverbs 3. 13-18.

Explanations and Comments

The Parable Of the Sower, a Study In Soils, verses 1-9.—One day so great a crowd gathered around Jesus on the shore of the Sea of Galilee that He entered a fishing boat. When far enough from the multitude to be free from their importunities, yet near enough to address them, He taught them many things in parables. The word "parable" is derived from the Greek "paraballein," "para" besides and "ballein," to throw, and means literally "to place side by side," hence to "compare." A parable is a short, fictitious narrative of something which might really occur in life or nature by means of which a moral is drawn. An excellent definition of a parable as used by Jesus has been given thus: "A narrative, fictitious, but agreeable to the laws and usages of human life, by which either the duties of men or the things of God, particularly the nature and history of God's Kingdom, are figuratively portrayed."

Within the view of Jesus as He spoke His parable of the Sower, there may have been a sower at work in a cornfield which descended to the water's edge. Dean Stanley describes such a field: There was the trodden pathway running through the midst of it, with no fence or hedge to prevent the seed from falling here or there on either side of it or upon it; itself hard with the constant tramp of horse, mule, and human feet. There was the good rich soil; there was the rocky ground on the hillside protruding here and there through the cornfields; there were the large bushes of thorn—the "nabk," the kind of which tradition says the crown of thorns was woven—springing up in the very midst of the waving wheat.

A sower was sowing seed, so runs the parable. He lived in a hamlet or village, as all farmers do now in Palestine, and went to the unfenced field afar off to sow his seed. Some of it fell on the beaten path which ran through the field and lay there on top of the hard surface till birds devoured it. Some of the seed fell on the hillside where the underlying rock came very near the surface; the soil there was shallow and the warmth of the rock made the seed spring up quickly and look very promising, but the roots of the plants could not strike deepdown and avoid the heat of the sun, and therefore the plants quickly withered away. Plants from the seed that fell where seeds of thorns were plentiful were overshadowed and starved to death by the more rapidly growing thorns. Some seed there was that fell on good ground, where the soil was rich and deep and free from thorns, and it yielded thirty and sixty and even a hundredfold. He that hath ears to hear—thus Jesus ended His parable.

We are not much of a cook, but we do know better than to boil two cups of rice for two people.

BRISKER DEMAND FOR POOL WHEAT IS ANTICIPATED

Montreal.—As a result of conferences held in London between representatives of the Wheat Pools, the British Government and the British Milling Association, there is the strongest reason to believe that purchases of Canadian Wheat in future will not only be increased but will be made in an orderly manner covering the crop year.

A. J. McPhail and W. A. McLeod, the Wheat Pool representatives who conferred with the British Government and the Milling Association, declined to be quoted in regard to their mission. Neither would they issue any statement except a brief note dealing with the conferences with Rt. Hon. J. A. Thomas. This note is couched in very definite language.

Informally, it was learned that the conference in London failed to achieve the results entertained by Mr. Thomas while in Canada last autumn. Mr. Thomas had a plan whereby the export movement of wheat to Great Britain could be regulated. In the past the export of wheat has been irregular. There have been very heavy outward movements in some months and practically none at all in other months. In the seasons of glut much of the grain has been carried in tramp ships, which carried little or no cargo other than wheat.

Mr. Thomas was inclined to believe that if the British Government built large storage elevators in England a steady movement of wheat from Canada could be assured. This would tend to provide freight liners with cargo the year around and might go far to solve one of the greatest obstacles in the way of increased trade between the United Kingdom and Canada. He believed a steady western movement of freight might be built up if the eastward grain traffic was regulated.

It is understood that in the preliminary discussions between Mr. Thomas and the officials of the wheat pools last autumn, the officials were rather dubious of the scheme. They pointed out, it is believed, that they did not favor sending wheat abroad on consignment, unsold. They preferred to sell the wheat before it left American ports.

In the discussions which took place in London, it is understood that this view prevailed, and that Mr. Thomas has abandoned all intention of building storage elevators in the United Kingdom.

The discussions, however, revealed that the objective might be achieved in another way. It was felt that if the British Milling Association, which controls more than 60 per cent. of the milling industry in Great Britain, and is, therefore, the largest importer, would undertake to buy Canadian wheat steadily instead of entering the market only from time to time and buying heavily—it was felt that if this could be brought about the desired result would follow.

To that end it is understood that Mr. Thomas, after holding several consultations with the wheat pool representatives, met the Milling Association. Finally there was a joint meeting between Mr. Thomas, the Milling Association and the wheat pool officials. The outcome, it is stated, was an informal agreement.

The Milling Association in future will endeavor to import Canadian wheat steadily.

This explains the statement made by Mr. Thomas to the effect that the conference with the wheat pools probably will have beneficial effect upon British Canadian Trade.

Seeking Speed Record

British Racing Motorist Aims At 250 Miles An Hour

Southampton, England.—The noted British racing motorist, Kaye Don, sailed on the "Berengaria" for New York, en route to Daytona, Fla., where he will attempt to set a new speed record with his secretly constructed "Silver Bullet" machine.

"I have every confidence in my car," he said before sailing. "I hope within a month to establish a mark which—with a little luck—may be 250 miles an hour."

Well Known In Canada

Cardinal Merry del Val Dies At Vatican After Operation

Rome.—Cardinal Merry del Val, former papal secretary of state and in recent years archbishop of St. Peter's, died from heart failure after an operation for appendicitis.

Cardinal Merry del Val was secretary of state under Pope Pius X. He was particularly well known in Canada.

In 1896 he proceeded as papal delegate to Canada to report on the adjustment of claims of the Canadian bishops as to separate schools in Manitoba. He was protector of some religious orders in Canada, among them the Sisters of Charity, known as the Grey Sisters of Canada. Cardinal Merry del Val was one of the most distinguished figures in the modern history of the papacy. He was made a cardinal in 1903 at the comparatively early age of 38 and forthwith was created secretary of state to Pope Pius X.

The cardinal was of noble Spanish birth. His father was Spanish ambassador to the court of St. James when the future cardinal was born in London, in 1866.

Nine Lose Lives In Fire

Mother Superior and Eight Children Perish In Northern School

The Pas.—Eight Indian pupils and a mother superior of the Cross Lake School, 125 miles northwest of here, were burned to death when fire raged through their school several days ago, according to word relayed in here by Indian runners.

Only meagre details of the tragedy were brought in. It is not known how the fire originated. The Cross Lake School was a stone structure, and was valued at \$30,000.

It is thought that the fire started on the third floor of the building, in the west part of the main section, where the Indian girls were quartered.

The sister superior died in a brave attempt to lead some of the children through the flaming building to safety. All of the children who perished were under nine years of age.

Left Fortune To Charity

Late W. F. Alloway Bequeaths Huge Amount To Foundation

Winnipeg.—The Winnipeg Foundation, a charitable institution, is bequeathed \$1,200,000 by the will of the late Mr. W. F. Alloway, who left an estate of \$1,244,000. The sum of \$216,000 is set aside for the purpose of paying the income to certain relatives of Mr. Alloway and his personal servant. On the death of each beneficiary the income reverts to the Foundation.

During his lifetime Mr. Alloway made gifts to relatives which are said to total \$100,000. Mr. Alloway died on February 2.

Mrs. Alloway, who died in November, 1926, left her estate, amounting to \$733,881, to the Foundation. The gifts of Mr. and Mrs. Alloway to the Foundation now total \$2,000,000.

Australia Recalls Trade Commissioner

Government Displeased By Speech He Made In Report

Sydney, Aus.—Australia's trade commissioner at Ottawa, R. A. Haynes, has been recalled by the Commonwealth Government as a result of a speech he delivered in Canada, it is understood.

The Australian Government is said to have been displeased by alleged references of Mr. Haynes to more peaceful conditions in Canadian industry than in Australian industry.

The Federal Government is said to have considered that such utterances were harmful to the commonwealth's prestige abroad.

Would Deport Drunken Drivers

Deportation for one year of U.S. citizens found guilty of driving autos while drunk in Canada was urged by deputy magistrate Arthur Hanrahan, of Windsor, at the meeting of the chief constables' association of Essex and Kent counties, held at Windsor.

Five states have abolished fixed speed limits for automobiles.

MAKES IMPORTANT DISCOVERY

Dr. J. B. Collip, chairman of the Department of Bio-chemistry, at McGill University, and co-worker with Dr. F. G. Banting, in discovery of insulin, who has succeeded in isolating a gland extract of great value in relieving certain disorders.

Safeguard Canadian Wheat

Proposes Tax On Export Wheat Going Into United States

Ottawa.—With the view to preventing the mixing of Canadian wheat exported through United States ports, J. G. Ross, (Liberal, Moose Jaw), presented a resolution in the House of Commons calling for a tax of 10 cents per bushel to be paid when the wheat entered the United States, and rebated when exported from an American port. The tax, he suggested, might be paid either in cash or by filing a bond and the rebate would be conditional upon the wheat being up to Canadian standards on leaving the United States.

There was no doubt, Mr. Ross contended, that mixing Canadian wheat with American wheat and with lower grades was being carried on in the United States. He wanted some provision to safeguard the value of the Canadian certificates issued by the board of grain commissioners. This could only be done by inspection at the time the wheat left the United States.

Furthermore, he said, the measure would tend to place Canadian ports in a better competitive position. Restrictions now placed on the handling in Canada with the effect of discriminating against Canadian channels and Canadian ports. The resolution was finally withdrawn, but will come up again in the agriculture committee.

Insurance For Canada's Unemployed Predicted

Premier King Hopes Plan Will Soon Be Worked Out

Ottawa, Ont.—Eventually Canada will have a system of unemployment insurance, Premier MacKenzie King predicted, in replying to a deputation seeking Federal aid to municipalities and provinces on unemployment relief. This, he said, was the only constructive way to deal with the unemployment situation and he hoped it would soon be possible to work out an insurance plan.

Seasonal measures in the way of relief and public works were of no permanent assistance, and an insurance plan offered the only constructive way of avoiding distress. Under it those who expected relief and those who employed them would be compelled to contribute to a fund during their periods of employment, and would receive benefits when out of work.

While efforts had apparently been made by Mayor Webb, of Winnipeg, pursuant to the decisions of the recent conference on unemployment in the Manitoba capital, to secure representation from all parts of the country on the delegation which recently presented the case for unemployed relief, it was significant that only the large cities of Western Canada were represented.

Asks Tighter Motor Laws

Bill Introduced In Federal House By T. L. Church

Ottawa, Ont.—"Hit and run" drivers especially will be subject to drastic punishment if a bill introduced in the House of Commons by T. L. Church (Cons., Toronto Northwest), becomes law.

The penalty of death for murder is proposed for causing the death of any person by reckless or negligent or furious driving and failure to render aid and reporting the accident.

Two years' imprisonment, or a fine or both fine and imprisonment, are suggested for reckless driving.

Five years' imprisonment and a fine for driving an automobile in a manner dangerous to the public and thereby causing an accident are proposed.

Five years' imprisonment and a fine for failing to stop and render aid and particulars as to ownership of car when an injury is caused by dangerous driving are suggested.

Royal York Addition

Outlined in above cut is shown the addition of 160 rooms to the Royal York Hotel, which even before this enlargement was the largest and tallest in the British Empire. It brings the total number of special suites in the hotel from 62 to 68 and increases the number of rooms to 1,164. The addition rises twenty-one stories above the mezzanine floor bringing it into conformity with the height of the rest of the building, except, of course, the tower.

The new wing will be ready for occupation by June, in time for the monster Shriners' convention slated to be held at the Royal York and to accommodate which a town of sleeping cars and marquees, entitled "Fez City," will be erected by the Canadian Pacific Railway.

FARMERS REJECT PROPOSALS TO ENTER POLITICS

Saskatoon.—By a narrow margin of nine votes the United Farmers of Canada (Saskatchewan section), defeated a proposal having for its object the participation of the organization in politics as an active unit.

The vote was 314 to 305.

The resolution was in form of an amendment to the constitution which, if adopted, would have paved the way for political action.

Farmers of Saskatchewan—Canada's greatest wheat-growing province—went on record as favoring compulsory pooling of commodities. After long hours of debate, United Farmers of Canada (Saskatchewan section), gave almost unanimous approval to a compromise resolution presented by the board of directors.

By the resolution, directors of the farm board are ordered to "Stand ready to work with the Wheat Pool board of directors or the directors of any other pool in requesting that there be placed in the statute books of Saskatchewan an act known as the Primary Products Act, whereby the growers of any commodity may obtain control of the marketing of all that commodity grown in the provinces."

Only three dissenting votes marred unanimity of support, according to the statement of the publicity committee, given out after the convention had made its decision behind closed doors. The approved resolutions stated that it is expedient that the producers should be able at all times to express their opinion on and obtain, if they so desire, 100 per cent. commodity marketing control of all or any primary product.

Details of the manner in which the proposed Primary Products Act would be worded are not contained in the finally-carried resolution. The details, it specifies, are to be dealt with by a committee appointed from and by the boards of the United Farmers of Canada, and the Commodity Pool concerned. A board resolution published in the Delegates' Handbook, outlining possible legislation, was not given approval.

According to this resolution, later substituted in the convention, petition by one-fifth of the producers of any commodity would bring a government plebiscite among such producers as to whether they desired compulsory pooling. Should the vote result in two-thirds of the vote cast favor law-enforced 100 per cent. pooling, the commodity would be declared a commodity under the Primary Products Act. At a date set by the government, commodity producers would elect delegates or directors to control marketing of the commodity in question.

While no specific product is mentioned in the approved resolution, it is generally considered that first compulsory-pool activity will be toward marketing all grain grown in Saskatchewan through the wheat pool. Directors of the Saskatchewan Wheat Pool, with whom the U.F.C. directors must "Stand ready to act," have declared no definite stand. President A. J. McPhail has spoken against the compulsory pool, but L. C. Brouillette, vice-president, is an avowed adherent.

Formation of a compulsory wheat pool in Saskatchewan—which, of course, would have to be preceded by legislation and by a two-thirds vote of the province's wheat producers—would mean that some 60 per cent. of all Canada's wheat crop would be handled by the Saskatchewan pool. In the 1928-29 season, the Canadian Pools handled 253,000,000 bushels of a total Canada wheat crop of 547,000,000 bushels—and of the pool total some 157,000,000 bushels were raised in Saskatchewan.

Regrets Illegal Seizure

Washington, D.C.—The United States has expressed its regrets to Canada for illegal seizure of the motor boat 210-P in the St. Claire River last September. The seizure took place in Canadian waters.

A new type of cactus has been found in South America with long slender leaves resembling snakes.

Enormous Annual Losses Suffered By Farmers Due To Ravages Of Smut And Other Plant Diseases

The word disease generally brings to our minds a suggestion of some ailment which has fallen to the lot of man or beast. It rarely occurs to us that plants are subject to a line-up of disorders which would make the average sufferer from human ailments well by comparison. It is also true that the cost of plant disease is quite comparable to the money spent every year for doctor bills and the money lost through sickness.

Take our common smuts for example. They are plant diseases when we come to consider the matter, and the are among the most expensive luxuries which the farmers of Western Canada annually indulge in. In fact they probably cost the average farm considerably more than the car, for we learn that oat smuts alone cost the farmers of Ontario some two and one half millions. If a horse is laid up for a quarter of the year with a bad sweeney we soon think of the money it is costing to feed him, but smut can slip in and take a quarter of the oat crop and the loss is never noticed.

The smuts are bad enough, but as every farmer knows they are largely preventable. The worst offenders are the rusts, they are harder to deal with and, while the development of rust resistant varieties of wheat is now only a matter of time, we still lose several millions annually to those little spots on the stems which might be called the smallpox of plants.

But the smuts and rusts are only a beginning. There are cankers and galls, the potato has an imposing lineup of blights, rots and scabs, the fruit trees have their diseases from root to fruit. The loss caused by plant diseases each year is very nearly as great as the national debt. Most plant ailments are now preventable in the same way that science has gotten most human ailments under control, and with the additional possibility of breeding disease resistant plants, it is likely that in the next few years we shall see a decided reduction in the losses due to the diseases of plants. It is interesting, however, to remember that our human ailments are not the only ones which prove costly and which reduce our national efficiency.

Studying Cement Treatment

Saskatchewan University Professor Spending Some Months In Berlin

Professor Thorbergur Thorwaldson, of the University of Saskatchewan, building cement expert, is here conferring with Prof. Wilhelm Eitel, of the Kaiser Wilhelm Institute for the Advancement of Science, with a view to finding methods of improving cement.

Prof. Thorwaldson explained he was particularly interested in observing the X-ray work on crystals, carried out by Prof. Eitel, who is one of the greatest authorities on silicates.

"In our part of the country, cement is an important commercial article, and everything that can be done to improve its quality is of vital interest. I am thus combining scientific research with practical purpose by seeing in what way Eitel's methods can be applied to cement," he said.

Prof. Thorwaldson expects to remain here for three or four months.

"Your uncle is 90 and still mentally active?"

"Yes, he plays chess every evening."

"Is he still physically active?"

"Rather. If he does not win he hits his opponent over the head with the chess board."—Fliegende Blätter, Munich.

W. N. U. 1827

Suggests Settlement Plan

Soldiers' Settlement Board Supervisor Has Idea Of Colony

A scheme for future land settlement was outlined at Hudson Bay Junction before the Royal Saskatchewan commission on immigration and settlement by Captain A. A. Batchelor, supervisor of the Soldier Settlement Board for the district.

"A block of land, consisting of a township or more, should be selected," he said, "and fields of 50 acres cleared and cultivated on alternate sections. A main road should be built and a barn and water supply provided for each farm. A school and a central community hall, which could be used as a church, should be built. Then, selected families from Great Britain should be placed on this land, which would be sold to them at the actual cost of improvements."

The taking of such land, according to Captain Batchelor's scheme, would mean the forfeiture of any homestead right. He would have the alternate sections treated in the same manner after a period of two years from the first settlement, and these thrown open to Canadian people on the same basis.

Not Ready For Zoo

Horses Are Being Used More Than Ever In Chicago

Not long ago the city fathers of Chicago were thinking of setting aside a pasture in Lincoln Park Zoological Gardens for the horse as a rare animal, but now city life is offering excellent careers for young horses willing to work as haulers of milk waggons, ice vans, and fruit trucks, with the prospect of a nice green field in 20 years. Horses have shown a remarkable revival in Chicago, where 10,741 horse-drawn vehicles were registered in the first seven months of 1929, as against 11,986 in the whole year of 1928.

Always throw a drowning man a rope, even if he's trying to commit suicide. If the water isn't deep enough, he may want to hang himself.

LEADING AGRICULTURIST

With fifteen years practical experience in agricultural and livestock affairs and having represented Canada on an Imperial committee to study the meat supply of the British Empire, Leonard Christie McQuat has recently been appointed general agricultural agent of the Canadian Pacific Railway. He was born at St. Andrews East, Quebec, in 1892, and took his degree of Bachelor of Science in Agriculture at McGill University. After returning from military service in the war, Mr. McQuat was called to Ottawa as bacon specialist of the Dominion Livestock Branch, Department of Agriculture, and, following a special study of the British meat market, was selected to join the first Imperial Economic Committee to investigate and report on British Empire meat supply which met in London, in 1925. His wide knowledge and experience are now at the service of the Canadian Pacific Railway.

Another Non-Sleeper

Man In England Claims He Has Been Awake Twenty Years

An amazing record is claimed by E. T. Maher, of Heaton, Newcastle, England, who affirms he has not slept for 20 years, according to the Manchester Guardian. Mr. Maher, who works as a store keeper in Newcastle, was known as the battalion "caller up" whilst serving with the York and Lancaster Regiment during the war.

He has undergone several operations, but the doctors are still baffled. It is stated that they can neither explain the affliction or cure him.

Study Of Dairy Conditions In Canada During The Past Decade Is Well Worthy Of Attention

Canada's Exhibits At the Poultry Congress

Each Province Is Working On Its Own Display

Canada will occupy a conspicuous part in the forthcoming World's Poultry Congress. No pains are being spared to take full advantage of the opportunities provided in putting up exhibits that will be a credit to the country.

The national exhibit being prepared on an elaborate scale by the Live Stock Branch of the Department of Agriculture, at Ottawa, will demonstrate clearly the policies that have developed the Canadian poultry industry to its present enviable position, but will also show the effect of the policies in operation upon poultry and egg consumption.

The provinces are equally active in preparing their displays that will draw attention to not only the poultry industry, but other activities of world interest. The Maritime Provinces are getting together in putting up one exhibit. The three Prairie Provinces are co-ordinating their forces in a similar manner, while the other provinces are each preparing elaborate displays for definite spaces that have been allotted to them in the great Crystal Palace.

The Live Birds Exhibit of one thousand head, including chickens, waterfowl and rabbits, is being arranged on a national scale, and will include representatives not only of the hardy, high-producing stock of the most popular birds, but will also include representative specimens of what are sometimes termed "Fancy Breeds," and including waterfowl and pigeons. The exhibits will be a credit to Canada.

Byron's Home Purchased

Historic old Newstead Abbey, famous as the ancestral home of Lord Byron, has been purchased by Sir Julien Cahn for presentation to the British nation unconditionally. Sir Julien is a noted philanthropist and sportsman. By owning a half share in the Stock Exchange sweep ticket on Trigo, Derby winner of last year, he won \$310,000.

With the round of dairy conventions in the prairie provinces complete for 1930, some facts and figures issued by J. F. Singleton, acting dairy commissioner, are of interest.

A study of dairy conditions from 1920 to the end of 1929 shows that there are fewer establishments turning out butter, cheese and milk products, but the number of producers of milk has increased; that there has been an increase in the total number of cows and in the number of cows in a herd; that the production of creamery butter has increased materially while that of cheese has decreased; there has been no material change in the production of evaporated or condensed milk, but a very decided increase in milk powder and condensed skim-milk; there has been an increase in the total milk production and also a greater volume has been produced per establishment.

Between 1920 and 1927, with the exception of the province of Quebec, which is not included, Canada increased her creamery butter production 60.9 per cent.; and decreased cheese production 7.8 per cent. The quantity of milk sold for immediate consumption increased 48.9 per cent., and the quantity of cream sold calculated in terms of butterfat increased 54.9 per cent. The total number of cows increased from 1,599,145 in 1920, to 2,124,362 in 1927.

In 1929 Canada imported 32,132,486 pounds of creamery butter, valued at \$11,424,476, and 2,003,470 pounds of cheese, valued at \$597,782. In the same period Canada exported 1,480,600 pounds of butter, valued at \$617,483, and 93,556,100 pounds of cheese valued at \$18,752,660, and 2,416,479 gallons of cream, valued at \$4,999,026. In 1929 the total value of dairy products imported in to Canada was \$12,085,653, and the total value of exports, \$27,993,673, leaving a net value of exports over imports of \$15,888,020.

The increase in total consumption of butter, cheese, milk and ice cream expressed in terms of fat equivalent was 143,026,288 pounds.

The figures show that there is still room for a very considerable increase in the per capita consumption of cheese and also the indication is pretty plain from the per pound value of exports over imports that sometimes it may be economically sound to export at some seasons and import at others.

The imports of butter were, of course, mainly from New Zealand, and George Barr's advice to Ontario creamery men may also apply to mass production in the west, namely, make your whole output so good that the consuming public will be glad to pay more for it than they would have to pay for New Zealand.

Used To Credit Sales

Clerk Was Astonished When Offered Cash For Purchase

A New York paper says: A big merchandising event came recently when a young couple from out of town, who have just settled down in the East Nineties, went to Sloane's to buy some chintz curtains. They gave the clerk who waited on them the exact amount of the purchase in cash. He stood staring at the money. "What's wrong?" asked the husband. "Well, sir," said the clerk at last, "I've worked here many years, but I never made a cash sale before and I—scarcely know what to do with the money."

"May Providence grant you everything good in the New Year."

Mrs. Newrich: "Thanks. We are not dependent on the charity of others."—Jugend, Munich.

QUEENS

Not even Versailles in the heyday of its fashion graced about its queen a court more beautiful than that which will adorn the Queen of The Pas Winter Carnival on March 4th. Candidates for the Queen will be chosen from the attractive western girls shown above. Reading downwards they are: 1, Miss Laura Robson, Flin Flon Mines, Man.; 2, Miss Enid McGregor, Regina, Sask.; 3, Miss Margaret Halliday, The Pas, Man.; 4, Miss Annabelle Halderson, Winnipeg; 5, Miss Helen Mulhal, The Pas, Man.; 6, Miss Gladys Chute, The Pas, Man.; 7, Miss Mabel Milne, Saskatoon, Sask.

Canyons In Jasper Park

The number and depth of the canyons in Jasper National Park in the province of Alberta, are of special interest to nature lovers. Each canyon possesses a turbulent stream and often a fine waterfall as well. The Athabaska and Maligne canyons, the Rocky River, Fiddle Creek, and Ogre canyons to the east, and the Snake Indian canyon with its magnificent cataract, are among the most spectacular in this wide park reserve of 4,521 square miles.

CHAPTER III.—Continued

"A very green hat?" questioned the doctor.

"Exceedingly green," replied Charmian. "Have you made its acquaintance this soon?"

"No, but we passed it on the road, or more correctly speaking, on the girl. I'll say it was some hat!"

"It came from Chicago," sighed Charmian. "It was ordered by mail. Are you aware what a—er—distinguished thing it is to order a hat by mail?"

Though she spoke soberly, the corners of her mouth refused to remain sedate, and the doctor burst into a hearty laugh. They were chatting like old friends when they joined Grandma a moment later.

"You seem to be having a real good time," she commented. "Sit down, both of you. No use wasting your strength standing when it's not necessary. The doctor's over to the Oldhams' giving Susy a talking-to, or I miss my guess. She's been feeding her baby mince pie again. At least, I think she has for the poor child's in a spasm and the doctor had to run. He was black in the face—the baby, I mean; and little Jamie was all out of breath from hurrying. Well, young man, did you decide on a room or aren't they good enough?"

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Med. Co., Lynn, Mass., U. S. A.
and Galtburg, Ontario, Canada.

W. N. U. 1827

"They're much too good," replied John Carter, as he brought a chair for Charmian, and took the one by Grandma himself. "I shall feel like royalty, sleeping in that magnificent old bedstead."

"The four-poster? Then you've taken the room in the ell. Well, it'll make things easier for Charmian, even though it doesn't seem exactly proper to let you sleep where the help used to. It's sunny. I'll admit that, and warm in winter. Father Davis wasn't one to put his help into a cold room. They're human beings like the rest of us," he used to say, "and they shan't freeze so long as they'll carry up the coal." That was before we put in the furnace. We had the first furnace in Wickfield," she added proudly. "Folks came from far and near to see it, and stand on the registers. I remember old Miss Buzzell saying that it was immoral to be so comfortable."

"I venture to guess that Miss Buzzell wasn't a cheerful person to have about," said John Carter with a smile. "And you've guessed right," replied Grandma with decision. "Nothing ever suited Bessie Buzzell. Yes, you can smile, but that was the name they gave her in the cradle, and she carried it to the grave, no man ever having the courage to ask her to change it. The weather was always too hot for Bessie Buzzell, or too cold. If the sun shone, she'd be sure it would rain next day; or if it rained, she was certain it would rain all the week. The minister preached too long, or else he wasn't giving full measure for his salary. Father Davis used to say that when they gave her a harp in Kingdom Come, she'd ask for a bass drum. Here's the doctor now; but Lizzie Baker's stopped him at the fence. Was Lizzie ailing when you were there, Charmian? If she is, and eats that pudding for her supper, she'll regret it."

"I imagine," replied Charmian, "that she merely wants to hear the latest gossip, and hopes the doctor can supply it."

"She'll be disappointed," returned Grandma with a chuckle. "If anybody in Wickfield knows how to keep his mouth shut, it's Edward Howe. That's what you'll have to learn, young man if you haven't learned it already. A doctor who's a busybody never succeeds. Folks know they see too much, coming in when there's sickness in the house and things upset. Why, some folks aren't the same characters at all come sickness! There's Jamie Oldham, a limb of Satan if I ever saw one; but get him all broken out with measles, or his neck tied up in a rag for sore throat, and he's the meekest lamb that ever bleat."

"And his father's just the opposite—as godly a man as ever passed the contribution box on Sunday; but when he has a cold in the head, Susy (she's his second wife), goes almost crazy. Once Ezra Bascomb was setting a light o' glass in the Oldhams' cellar window. He's our R. F. D. man, but he does such jobs on holidays to help folks out and make an extra dollar. Well, Ezra was working in the cellar, but the door upstairs was open into the kitchen. The deacon was laid up with a touch of rheumatism, and he swears—"

"Who? The deacon?" interrupted John Carter, grinning.

Grandma's eyes twinkled. "Well, according to Ezra," she began; then broke off suddenly. "Dear me! here I am commending Edward Howe for keeping his mouth shut, and rattling on about my neighbors with my next breath! But you'll find us out, fallings and all, if you stay in Wickfield. Charmian, you run and make some lemonade. Here comes the doctor, and he looks hot."

CHAPTER IV.

Charmian stood on a stepladder in the room that had been Great-grandfather Davis's law office. The doors and windows were opened to the breeze, and one passing could have seen, at frequent intervals, the furious shaking of a duster. For three weeks the doctor had occupied the ell bedroom. It had been Grandma's suggestion that he use the small building across the driveway for an office. They were at breakfast one morning when the idea came to her.

"Look here," she said. "You ought to have a place to see your patients. They'll have none of you so long as you go to Edward Howe's. Why not use Father Davis's office? It's handy to the street, and as good a location as you could find."

"You mean that little old place in the yard here?"

Grandma nodded.

"It's years since it's been used; but it's well built, and won't need a mite of repairing. Joseph Ames built it, and there wasn't an honest carpenter in town. There's a good fireplace, and a desk and plenty of bookshelves. Father's books can go up attic to make room for yours."

"Gosh!" ejaculated the young man, so fervently, that Charmian laughed as she handed him a cup of coffee.

"You seem impressed," she ventured.

"I am. It's an inspiration. I was just wondering if I'd better try to get a room over the hardware store; but this will be so much pleasanter and more convenient. It seems almost too good to be true—this wonderful boarding place, and an office just across the driveway. May I see it now?"

"Not till you've eaten a proper breakfast," replied Grandma. "Pass him the toast, Charmian, I think he's too shy to ask for a second piece."

"I'm not," denied the doctor, with his engaging grin, "but if you continue to feed me so bountifully, and your neighbors refuse to give me any work, I shall put on too much weight."

"You could stand a few pounds more and not be too fleshy," Grandma retorted, scrutinizing him closely. "Seems to me your cheek bones need more covering."

"Grandma," reproved Charmian sternly, "you mustn't make personal remarks. And if you're really through breakfast, Doctor Carter, I'll get the key and we'll inspect your office. I don't see why we didn't think of it before."

"I'm glad it's set flush with the sidewalk so I can see from the window who comes to you for medicine," commented Grandma. She had followed them to the door, and glanced up as Charmian reached for a key hanging on a nail. "Dear me," she sighed, "how many years it is since I used to see Father Davis take that very key down every morning. It doesn't seem hardly longer away than yesterday, and it's almost a life time. Be careful not to soil your dress, dearie. There'll be a sight of dust on everything."

"Want to come?" questioned the doctor. "I'll help you across."

Grandma shook her head.

"I've got to watch for the R. F. D. man, Ezra Bascomb. He promised to bring me a message from Emmy, and he might forget it if I don't wave. You open the doors and windows and let the air blow through. It'll be a good day's work to clean it up."

As the key grated in the lock and the door swung back, John Carter uttered an exclamation of pleasure.

"What a peach of a place!"

"Isn't it?" said Charmian. "And this room at the side will make a splendid waiting-room. I used to long to use the whole thing for a play house. Aren't these casement windows beautiful—and the mantel, too? You'd know that this was built in the days when carpentry was an art, and a good builder took pride in his work. Joseph Ames carved those fluted columns himself. I remember hearing grandfather tell about it when I was a little girl. Let's open the windows. Grandma's right, it will take a lot of work to get it clean."

"I'll hire some one to do it. It's much too dirty a job for you."

Charmian laughed.

"It's not easy to hire any one in Wickfield; and many's the time I've tackled worse things than this! If you'll pitch in and help—"

"I'll do every bit of it, while you sit still and give the necessary directions. My fingers itch to begin; but I promised Doctor Howe to go his rounds with him this morning. And don't you dare touch it in my absence, young lady! I won't have you doing jobs like this for me."

Nevertheless, when the doctor was out of sight, the breakfast dishes disposed of, and luncheon planned, Charmian tied up her head in a blue handkerchief, donned a long apron, and

Minard's—50 Year Record of Success.

went across the driveway to the office.

"I'll make a start," she mused, as she stood for a moment surveying the dust of years. "The first thing is to clean the top bookshelves. No use sweeping the floor with all that dust to come down upon it." However, she had hardly reached the top step of the ladder when a shadow fell across the doorway and some one said:

"What in thunder are you doing here?"

"Gracious! How you scared me!" The girl turned around and regarded the caller from her perch. "Where'd you come from, Jim, this time of day?"

As Jim Bennett came nearer Charmian saw at once that he was wearing a new suit of rather better cut than usual, and that his shoes were polished to the "nth" degree.
(To Be Continued.)

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the New Born Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Edmonton Civic Utilities

The five Edmonton city owned utilities created a record surplus during 1929 of \$516,562, in comparison with a surplus of \$507,765 the year before.

Its pleasant smoke vapor quickly soothes and relieves asthma—also catarrh. Standard remedy at druggists, 35 cents, 60 cents, and \$1.50, powder or cigarette form. Send for **FREE TRIAL** package of 3 cigarettes. Canadian Distributors, Lymans, Ltd., Dept. BB-2, 256 St. Paul St., West, Montreal, Canada.

Dr. Guild's GREEN MOUNTAIN ASTHMA COMPOUND

Little Helps For This Week

"I will not let Thee go, except Thou bless me."—Genesis xxxii. 26.

Like a tide our work should rise,
Each later wave the best,
Today is a king in disguise,
Today is the special test.

Like a sawyer's work is life, —
The present makes the flaw;
And the only field for strife
Is the inch before the saw.

—John Boyle O'Reilly.

The days are ever divine. They come and go like muffled and veiled figures sent from a distant friendly party; but they say nothing, and if we do not use the gifts they bring they carry them as silently away.

—Ralph Waldo Emerson.

Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuralgia, neuritis, rheumatic pain.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

DON'T MISS IT

A. F. McKibbin has received word that he has been appointed a trustee for this district for the Alberta Pharmaceutical Association.

DONALD JOHNSTONE DIES

Donald Johnstone, proprietor of a fox farm at Shouldice Park, died at his residence there on Tuesday, March 4th, at the age of 62 years. He was at one time a mill owner in his native town of New London, P.E.I., and has been a resident of Calgary district for the past two years.

He leaves to mourn his loss one son, Dave, and five daughters, Florence, Mary, Helen and Mrs. L.H. McGill, all of Calgary, and Mrs. A. J. McLeod, of Carbon.

Funeral services will be held Thursday morning at 10.30 from Foster and Foster's funeral chapel, Rev. Jas. McNeill officiating. Burial will take place at Burnland cemetery—Calgary Albertan.

WOULD PREMIER ANDERSON WELCOME DEFEAT?

(Continued from front page)

that the role of keeping Dr. Anderson in office had developed upon them. In the twinkling of an eye they emerged from a position of complete irresponsibility to take their stand in the fierce white light that beats upon a throne.

They are already somewhat dissatisfied with the firing and hiring policy of the Government which has made about 250 changes in the civil service since it took office. They have had no objection to many of the firings, which they have considered justified; but they have had serious feeling over the hirings which, in some cases, it is claimed, have shown no improvement over the last policy.

They also distrust each other. The Progressive forces of Saskatchewan are not united. If the U.F.C. at its convention this month decides on political action, the Saskatchewan Progressive association will probably join hands with it. Even then, however, there are many Progressives who dislike the U.F.C.

But, as things stand, there will likely be some fancy tight rope walking on all sides when the House meets, each group is toe dancing on a tight wire. Each one afraid. If it knocks another off, it will only succeed in losing its own balance.

HELD BROKEN WIRES WITH HIS BARE HANDS

The hands of a young radio engineer, twitching with the shocks of a high voltage electric current, were literally "hands across the sea" recently. Through them passed the current which enabled listeners-in on radio stations to hear the international program which linked Great Britain, Canada and the United States at the opening of the naval conference in London. Just a few minutes before King George began the address which formally inaugurated the conference a member of the control room staff of the Columbia Broadcasting Company tripped over the wires to the generator that energizes the entire network. Harold Vivian, chief control operator, grasped the wires together in his hands to restore the circuit. Leakage of current through his body to the floor shook his arms with spasms, but he held on for 20 minutes until new wires could be connected.

WHAT IS A FRIEND?

What is a friend I will tell you. It is a person with whom you dare to be yourself. Your soul can go naked with him. He seems to ask of you to put on nothing, only to be what you are. He does not want you to be better or worse. When you are with him you as a prisoner feels who has been declared innocent. You do not have to be on your guard. You can say what you think, so long as it is genuinely you. He understands those contradictions in your nature that leads others to misjudge you. With him you can breathe free. You can avow your little vanities and envies and hates and vicious sparks, your meanness and absurdities, and in opening them up to him they are lost, dissolved on the white ocean of his loyalty. He understands. You do not have to be careful. You can abuse him, neglect him, tolerate him. Best of all, you can keep still with him. It makes no matter. He likes you. He is like fire that purges all you do. He is like water that cleanses all that you say. He is like wine that warms you to the bone. He understands, he understands. You can weep with him, pray with him. Thru' and underneath it all he sees, knows and loves you. A friend, I repeat, is one with whom you dare to be yourself.

CLASSIFIED ADS.

FOR SALE—½ section of land in the Carbon district. For information write the owner, Mrs. A. Hamilton, Mecheche, Alta.

FOR SALE—12 head of work horses, ranging from 5 to 10 years of age, and from 1200 to 1600 pounds. Apply to Alex Reid, Sr., Carbon.

AUCTION SALE OF SCHOOL LANDS

PUBLIC NOTICE is hereby given that an Auction Sale of School Lands will be held in the Province of Alberta, at the place and on the date hereafter mentioned:—

CALGARY, Monday, March 31st, 1930, at 9 o'clock A.M.

HANNA, Tuesday, April 1st, 1930, at 9 o'clock A.M.

STETTLE, Wednesday, April 9th, 1930, at 9 o'clock A.M.

The lands to be offered comprise only those which have reverted to the Crown owing to cancellation of former sales and which have been re-inspected and valued at \$7.00 or more per acre.

The lands will be disposed of subject to the usual terms and conditions pertaining to the sale of School lands at public auction.

Where any parcels of land are not sold the cultivation privileges for the year 1930 will be offered at time of sale and disposed of to the highest bidder, in accordance with the terms and conditions which will be announced at time of sale.

TERMS OF PAYMENT

One-tenth in cash at time of sale, and the balance in eighteen equal annual instalments with interest at the rate of six per cent per annum on the balance of the purchase money from time to time remaining unpaid, except in cases where the area of the land sold does not exceed forty acres, in which cases the terms of payment shall be one-fourth in cash and the balance in four equal instalments, with interest at the rate of six per cent per annum; overdue payments, whether of principal or interest, to bear interest at the rate of seven per cent per annum.

For Sales boundaries, other places at which sales will be held, and for further particulars see posters posted in post offices or apply to the Agent of Dominion Lands for district.

Lists of lands to be offered may be had on application to the Commissioner of Dominion Lands, Department of the Interior, Ottawa, Ontario, or to any agent or sub-agent of Dominion Lands in the Province of Alberta.

By Order,

J. W. MARTIN,

Commissioner of Dominion Lands
Department of the Interior, Ottawa,
1930.
